

PARTIES TO THIS AGREEMENT

THE DEVELOPER

Sunstate DevWorks

Mesa, Arizona 85212
(480) 793-9161
contact@sunstatedevworks.com

THE CLIENT

Aspen Chournos

Peak Pest Reno
peakpestreno.com
(208) 713-3179 / (801) 589-8620
Aspen.chournos@gmail.com

The Client wishes to engage Sunstate DevWorks (the “Developer”) for the rebuild of the business website for Peak Pest Reno, including all pages, integrations, and AI/SEO optimization as outlined below. The Developer agrees to perform these services in accordance with the terms laid out in this Agreement.

1. SCOPE OF WORK

The Developer will rebuild the existing Peak Pest Reno website into a modern, high-performing business site, with a strong focus on content quality, technical performance, and search visibility, including the following specific pages, features, and deliverables:

A. Website Rebuild & Pages

- **Complete Website Rebuild:** Full rebuild of peakpestreno.com from the ground up on Next.js, a modern React-based framework, redesigned to clearly communicate Peak Pest Reno's services, service area, and value proposition.
- **Homepage:** Hero section highlighting core services, clear calls-to-action (Request a Quote / Schedule Service), trust signals (reviews, certifications, service area), and an overview of pest control and renovation offerings.
- **Services Pages:** Dedicated pages for each core service line (pest control and renovation/repair services), with descriptions, process overviews, and relevant imagery.
- **About / Service Area Page:** Company story, team, certifications/licensing, and the cities/regions served.
- **Reviews & Trust Page:** Aggregated customer reviews and testimonials, with structured markup so reviews are eligible for rich results.
- **Contact / Quote Request Page:** Lead capture form with spam protection, click-to-call, and click-to-text for both owner contact numbers.

B. AI Search Optimization

The site will be built to perform well in AI-powered search results (AI Overviews, AI Mode, and similar features), focused on the fundamentals that drive real visibility:

- **Original, Expert Content:** Service and About pages written around Peak Pest Reno's own first-hand expertise and point of view — not recycled generic copy — organized in clear paragraphs and headings for human readers, supported by high-quality photos and video.
- **Clean Technical Foundation:** Built with Next.js server-side rendering (SSR/SSG) so every page is fully crawlable and indexable, with human-readable semantic HTML, strong page experience across devices, and no duplicate content.
- **Local Business Details:** Google Business Profile fully set up and aligned with the site to support visibility for local businesses in search.
- **No Wasted Effort:** The build stays focused on proven fundamentals rather than unnecessary extras like special AI markup files, artificial content chunking, or overbuilt structured data.

C. Integrations & Functionality

- **Lead Forms:** Quote request and contact forms routed to the Client's email/CRM of choice, with spam and bot protection.
- **Click-to-Call / Click-to-Text:** Direct call and text links for both owner phone numbers on mobile devices.
- **Google Business Profile Alignment:** Site content and structured data aligned with the Google Business Profile for consistency across search and maps.
- **Social Media Links:** Links to any active business social media profiles provided by the Client.
- **Mobile Responsiveness:** Fully responsive design across desktop, tablet, and mobile.

D. Technical SEO Setup

- **On-Page SEO:** Meta titles/descriptions, header optimization (H1-H3), local keyword integration, image alt text, and proper content hierarchy on all pages.
- **Technical SEO:** Site speed optimization, XML sitemap, robots.txt configuration, schema markup, and canonical tags.
- **Local SEO:** NAP (Name/Address/Phone) consistency, service-area pages, and local business schema.
- **Google Search Console & Analytics:** Sitemap submission, verification, and Google Analytics 4 integration.

E. Performance & Launch

- **Speed & Performance:** Image compression, caching, and code optimization for fast load times and strong Core Web Vitals.
- **Security Setup:** SSL installation, basic hardening, and spam/bot protection on contact forms.
- **Launch & Go-Live:** Final testing across browsers/devices, DNS configuration, and full website launch.

2. PROJECT TIMELINE

Project Start Date: Upon receipt of deposit payment
Estimated Completion: To be determined based on Client asset delivery

The Developer will make every effort to meet the agreed timeline, provided the Client supplies necessary assets promptly, including:

- Business branding, colors, fonts, and logo (if applicable)
- High-resolution photos of work, team, and completed projects
- Final text content for all pages (service descriptions, About, reviews)
- Access to existing domain registrar (DNS) and current hosting/website
- Google Business Profile access for alignment
- Any existing social media profile URLs
- Timely feedback and approvals on design mockups

3. FEES AND PAYMENT SCHEDULE

DESCRIPTION	AMOUNT

Monthly Billing: First payment due on the 1st of the month following launch. Cancellable by either party with 30 days written notice.

Note: Monthly hosting is entirely optional. If the Client hosts independently, a 30-day post-launch bug fix warranty applies (see Section 8).

4. CLIENT RESPONSIBILITIES

To prevent delays, the Client agrees to provide:

- Access to domain registrar (DNS) and hosting accounts (if applicable)
- High-resolution photos for all pages
- Final text content for all pages (service descriptions, About, reviews)
- Google Business Profile access for content/schema alignment
- Any existing social media profile URLs
- Timely feedback and approvals on design mockups and functionality

5. REVISIONS

This Agreement includes unlimited revisions until the website is launched and goes live. A "revision" is defined as a modification to existing content or layout within the agreed Scope of Work.

Minor new features or pages added after signing will be completed free of charge as a courtesy. Major additions or significant new functionality will be "Out of Scope" and billed at the Developer's standard rate of \$50/hr. The Developer will communicate before proceeding with any billable work.

6. INTELLECTUAL PROPERTY

- **Client Ownership:** Upon full payment of all fees, the Client shall own the final website code, design assets, and content.
- **Developer Rights:** Sunstate DevWorks retains the right to display the final project in their portfolio to demonstrate expertise.

7. CONFIDENTIALITY

The Developer acknowledges they may have access to confidential information (including business strategies, customer data, and platform credentials). The Developer agrees to keep all such information strictly confidential and use it solely for completing this project.

8. WARRANTY

The Developer warrants that the website will function as specified in the Scope of Work at the time of final delivery.

Bug Fixes:

- **With Monthly Growth Partner Plan (\$300/mo):** Continuous bug fixes and error corrections at no additional cost for the duration of the monthly service agreement.
- **Without Monthly Services:** A 30-day warranty period following project completion — any bugs or errors fixed at no additional cost to the Client.

Exclusions: Warranty does not cover: Client/third-party modifications, hosting/server problems (if Client uses own hosting), or browser updates after the warranty period.

Support After Warranty: Ongoing support available at the Developer's standard rate of \$50/hr.

SIGNATURES

IN WITNESS WHEREOF, the parties have signed this Agreement.
